## OBJECTIVE

---

A highly motivated Flutter developer with more than two years of experience crafting robust mobile applications for various platforms using Dart and Flutter. Proficient in creating seamless user interfaces, implementing clean code architecture, and enhancing application performance. Specializes in developing fast, and cross-platform applications with an emphasis on delivering an exceptional user experience

## Education

---

<b>B.E in Computer Science and Engineering</b> , BMS Institute of Technology and Management, Bengaluru, CGPA: 8.2/10.0	2021 – 2025
<b>Secondary School Certification</b> , Seiyun Model Secondary School	2016 – 2019

## Skills

---

<b>Technical Skills</b>	Flutter, Dart, Responsive and Adaptive Ui, Animations, Localization, Dark and Light Mode Sql, MySQL, Sqlite, Hive, Clean Architecture   MVVM, Dependency Injection Firebase, Firestore, Storage, Authentication, Messaging, Notifications, Problem-Solving State Manager   Bloc, Cubit, Git and GitHub, Dealing with Figma Restful API Integration using PHP and MYSQL, HTTP, Dio, Postman, Hostinger
<b>Soft Skills</b>	Good analytical skills, Effective Problem-Solving, Good in data structure and algorithms, Team working, Communication Skills, Research, Prioritizing tasks to meet tight deadlines

## Projects

---

### Note App [\(GitHub\)](#)

Developed a versatile note-taking application with features for user authorization, category management, and adding notes with images. The app allows users to organize notes by categories and secure them with password protection, ensuring a streamlined and personalized note management experience.

**Technologies:** Flutter, Dart, PHP, Postman, Firebase, Cubit & Bloc, Http, Lottie.

### E-Commerce App [\(GitHub\)](#)

Developed a multi-category Flutter e-commerce app featuring jewelry, men's and women's clothing, and electronics. Key features include product categories and favorites management, order tracking, and payment integration.

**Technologies:** Flutter, Dart, Postman, Cubit & Bloc, Http, Lottie.

### Books App [\(GitHub\)](#)

Developed a books app featuring clean architecture, responsive design, title search with debouncer, pagination, and integration with multiple online sources.

Implemented custom loading effects, error handling, and offline data storage for a seamless user experience.

**Technologies:** Flutter, Google Books API, Bloc, Clean Architecture | MVVM, Hive Local Storage, Dio.

## Certifications

---

### Flutter & Dart | Udemy

- Completed a 54-hour course on Dart and Flutter, covering advanced topics in mobile development.

### Git & Responsive & Adaptive UI | Udemy

- Completed a comprehensive course on version control using Git and GitHub.

### Flutter Course | Udemy | Clean Architecture | MVVM

- Completed a Flutter course covering clean architecture and MVVM design pattern.
